

FINAL REPORT

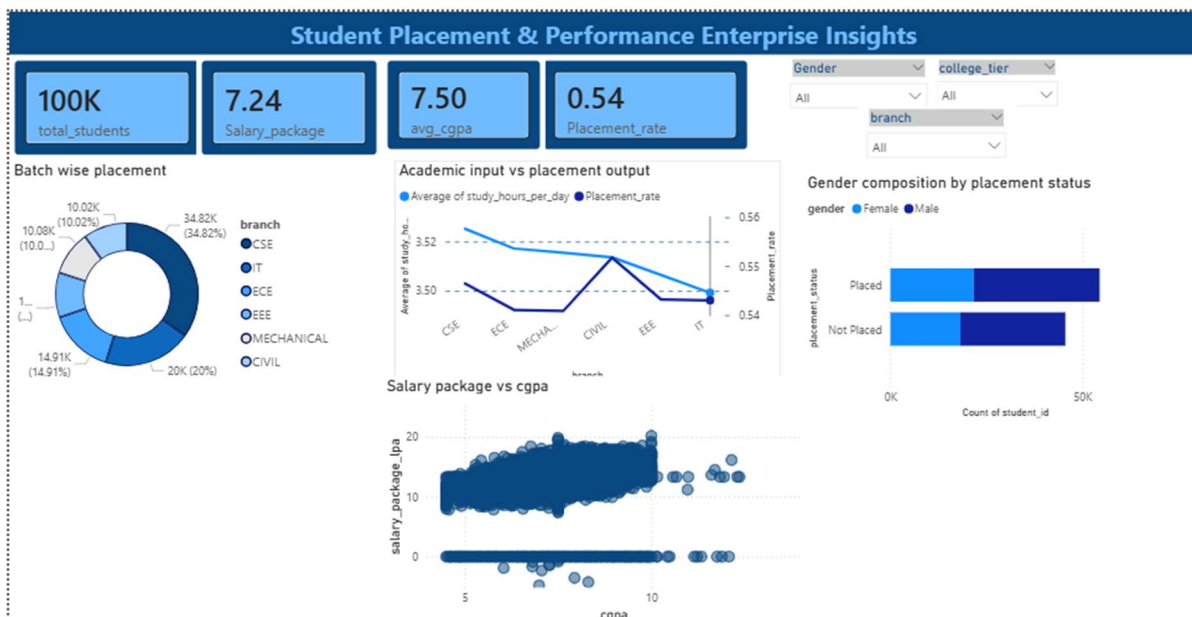

CHART- WISE INSIGHTS:

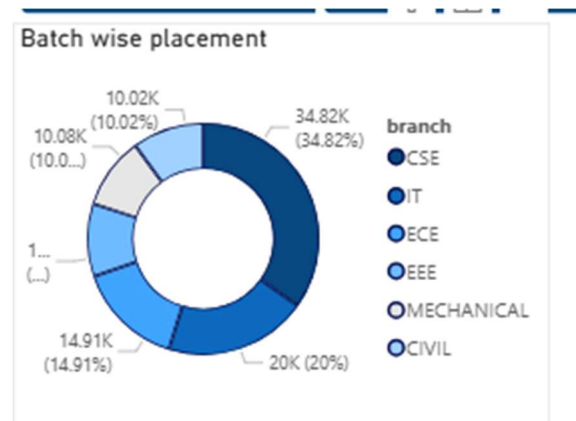

Three slicers have been placed to make this dashboard an interactive one

1. Gender
2. College Tier
3. Branch

Four Cards were created

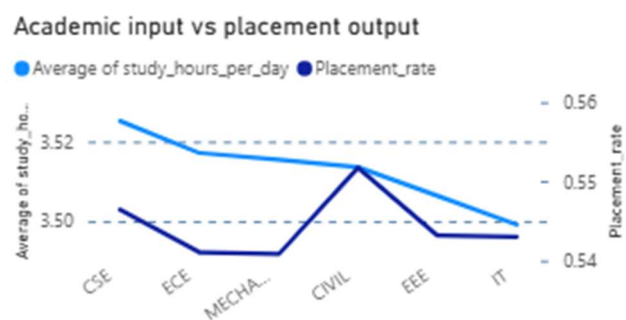

1. Total number of students
2. Average salary package
3. Average cgpa
4. Placement percentage

Batch wise placement (Donut chart)

Technical branches overwhelmingly dominate the student landscape. Computer Science (CSE) and Information Technology (IT) together command over **54.8%** of all registrations.

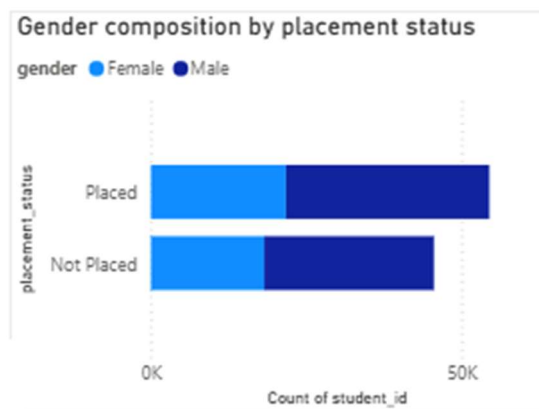

Academic study hrs vs placement output (Line chart)

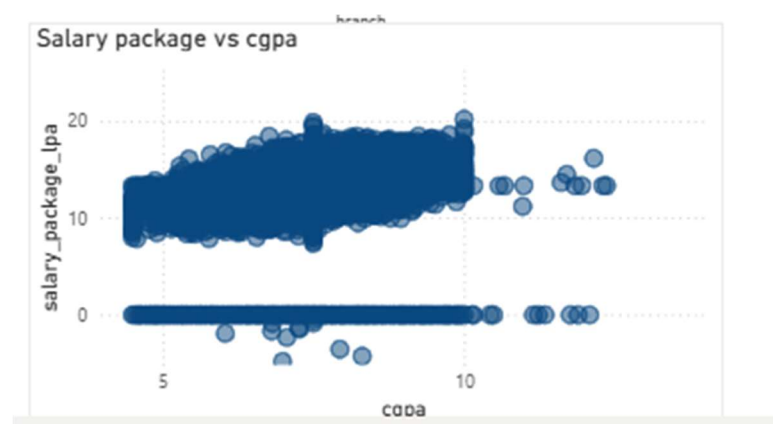

The students of CSE have studied well and got placed for a higher package

The students of IT have studied only for few hours and they placement rate is also little low

Gender composition by placement (stacked bar chart)

The total students who have been placed and not placed are similarly equal

This chart gives the relationship between salary package and Cgpa

Future enhancement:

Strengthen Placement Training Programs: Conduct regular aptitude, coding, communication, and mock interview sessions to improve placement rates.

Increase Industry Exposure: Encourage more internships, workshops, and industry interactions to enhance students' practical skills and employability.

Enhance Skill Development Initiatives: Provide additional certification programs and project-based learning opportunities to better prepare students for job requirements.
